## DETAILED ACTION

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael K. O'Neill on May 19, 2005.

The application has been amended as follows:

1. (Currently Amended) A computer-implemented method for storage of data sets ~~described using multiple different coordinate systems into a single file format~~, the method comprising the steps of: acquiring a first coordinate system data set; formatting the first coordinate system data set into non-Cartesian representation ~~(NC)~~ (NCR) format; and storing the data set formatted into NCR format in ~~the a~~ a single file format capable of storing at least one other coordinate system data set.
  
7. (Currently Amended) Computer apparatus for storage of data sets ~~described using multiple different coordinate systems into a single file format~~, the computer apparatus comprising: a central processing unit; and coupled to the CPU, a memory unit comprising: a data acquisition module for acquiring a first coordinate system data set; a formatting module in communication with the data acquisition module and configured to format the first coordinate system data set into NCR format; and a storage

module in communication with the formatting module and configured to store the NCR formatted data in ~~the~~ a single file format capable of storing at least one other coordinate system data set.

15. (Currently Amended) A computer-readable medium containing a computer program for storage of data sets ~~described using multiple different coordinate systems into a single file format~~, the computer program comprising: a data acquisition module for acquiring a first coordinate system data set; a formatting module in communication with the data acquisition module and configured to format the first coordinate system data set into NCR format; and a storage module in communication with the formatting module and configured to store the data formatted into NCR format in ~~the~~ a single file format capable of storing at least one other coordinate system data set.

***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

With regard to claim 1, the prior art taken singly or in combination fails to teach or suggest storing a data set formatted into NCR format in a single file format capable of storing at least one other coordinate system data set.

With regard to claim 7, the prior art taken singly or in combination fails to teach or suggest a storage module in communication with the formatting module and configured to store NCR formatted data in a single file format capable of storing at least one other coordinate system data set.

With regard to claim 15, the prior art taken singly or in combination fails to teach or suggest a storage module in communication with the formatting module and configured to store the data formatted into NCR format in a single file format capable of storing multiple at least one other coordinate system data set.

The closest cited art, Bell, describes acquiring a first coordinate system data set (Fig. 2, Source Coord. System 10); and formatting the first coordinate system data set into non-Cartesian representation (NCR) format (Fig. 2, Target Coord. System 20 and col. 3, lines 23-30).
